

Lifting the Veil

An Investigative History of the United States Pathocracy

Researched and Written by Timothy M. Silver

Chapter XV: The Pathocracy

On August 12, 1991, Investigative Journalist Danny Casolero was found dead in a bathtub at a hotel in West Virginia. He was in the state to meet a source on a story he was working on called “The Octopus”, which referred to a sprawling international criminal cabal that was exerting influence over a multitude of world events, such as the Iran hostage crisis that helped get Ronald Reagan elected. Although his death was ruled a suicide, the Casolero family was adamant it was a murder, citing threats on Danny's life.

“The Octopus” that Danny Casolero was following is the Pathocracy. It has grown over the centuries, spreading its many tentacles across the globe, tightening its grip on control of information, money, wars and beyond. The scope of this book was mostly kept within the context of the United States but the scope of the “Octopus” is truly international. Of course, we cannot fully know the extent of the beast until it is starved and dissected. But until then, we can still reasonably construct the 'big picture' of our current situation.

The history recounted thus far is the history of institutions that have become saturated with psychopaths, who began to act ruthlessly on their desires to control and manipulate others. The process is called Ponerology, a term coined by Polish psychologist Andrzej Lobaczewski, who studied how the governments of the Soviet bloc became increasingly evil. The term comes from the Greek word *poneria*, meaning lawlessness. Lobaczewski published his work in a book titled Political Ponerology.

Lobaczewski had tremendous difficulty in publishing his book; At one point the manuscript was thrown in the furnace shortly

before a raid by the secret police, and later the publication was blocked by none other than Zbigniew Brzezinski himself. He had hopes that by sending his manuscript to the Vatican, the word about Pathocracy would be heard on a global level. The manuscript was never returned. When he came to the United States, he figured that the freer society would be more accepting of his thesis; again, publication was blocked and his work was marginalized.

What was so revolutionary about Lobaczewski's work that it was repressed by the elite worldwide? It is impossible to come to any conclusion from his work except that the development of Pathocracy is inevitable as long as the general population is ignorant about the psychopathic other. Psychopaths have always existed, and they view the world of normal people, those with morality and conscience, as something to be looked down upon and exploited. Perhaps the most shocking revelation of his work is that psychopaths learn to recognize each other, even at a young age.

The natural result is a network of psychopaths, a subset of the population that recognize their differences and feel not only contempt for the rest of society, but the need to control and manipulate them as well. Over time they become experts in our weaknesses and follies, watching from a distance with curiosity and amusement.

The idea that Psychopaths can recognize each other is central to the Pathocracy. Imagine for millennia the process of evolution of a psychopathic cabal growing in power and numbers, increasingly manipulating society. You would think that the United States would think twice when in 2004 we had one presidential candidate who was a member of a powerful secretive society known as the Skull and Bones run against the Presidential incumbent who was also a member of the same secretive society.

Tim Russert: You're both were members of Skull and Bones, a secret society of Yale. What does that tell us?

Sen. John Kerry: Not much because it's a secret.

These connections are not insignificant, rather they are the tip of the iceberg of a vast covert network of collusion, the result of the process of the ponerization.

This process of ponerization has happened to the major centers of covert power in our world. The CIA, FBI, NSA and the global financial elite all the way down to local police departments have all become ponerized institutions.

Understanding the condition and development of ponerized networks is not just important, it is perhaps the most important information that society can have. It is the next step in evolution of society, the next grand paradigm shift.

This is the context under which the Pathocracy operates. A system of government hidden from the public view and operated by a psychologically distinct subset of the population whom do not feel empathy, have no conscience, and derive pleasure from the manipulation and abuse of the mass of the population they view as inferior. When we read accounts of horrific extreme abuse perpetrated against children, understand that the psychopathic other enjoys this abuse. They derive pleasure from torture and murder.

These psychopaths recognize each other and over time they come to be key holders of power wherever it exists in an unadulterated form. Seemingly antagonistic institutions such as competing banks are actually operated by the same psychopathic cabal behind the scenes. In the same way that you and I naturally exclude social deviants from our social groups, psychopaths do with normal people. The result is a web of mutual conditioning of evil. Through a vast propaganda matrix, the Pathocracy is slowly conditioning humanity to conform to their sick standards such as endless war, resulting in a large portion of the population displaying ‘secondary psychopathic’ tendencies. This is the group that has subverted democracy not only in the United States but around the world, and are currently manipulating world events behind the scenes.

512 Washington Post, “Area Writer Investigating [Inslaw Case](#) Found Dead,” August 13, 1991.

513 The book [Political Ponerology](#), though dense and sometimes difficult to navigate, is one of the most important pieces of literature ever written.
